

CIRES and CU Aerospace
Present:

Chiao-Yao She (Joe)

Professor Emeritus, Department of Physics, Colorado State University

Monday, February 14th, 2011 at 2:30pm
CIRES Auditorium (Room 338)
With refreshments to follow

What have we Learned about Upper Atmospheric Physics with Two Decades of Sodium Doppler Lidar Observation?

Laser beams into the night sky for the MLT science TUV contours; CSU Lidar

Prof. Chiao-Yao (Joe) She is one of the pioneers in the development of Na Doppler lidar and in the study of middle and upper atmosphere with Na lidar.

Prof. She received his PhD from Stanford University. He served as Assistant Professor at the University of Minnesota before coming to Colorado State University from 1968 - 2011.

Parking validation is available for the Euclid Parking facility on campus, [map](#).
