Errata

The last sentence of the abstract is incomplete because several words have been omitted. The complete sentence should be say “This is the first proof of the existence of a native European bird-pollinated plant, since besides its peculiarities (flowers odourless, pseudotubular, with no landing platform, pendulous, diurnal anthesis, copious dilute hexose-rich nectar), the flowers of the studied populations were mainly pollinated by three passeriform species.”

Ed.

1) Equation 2, which reads “\(\lambda = ((\delta^{15}N_{\text{consumer}} - \delta^{15}N_{\text{base}}) / \Delta \delta^{15}N) + 2\)”, should read “\(\lambda = ((\delta^{15}N_{\text{consumer}} - \delta^{15}N_{\text{base}}) / \Delta \delta^{15}N) + 1\)”.

2) In Appendix 1, two of the values for \(\Delta \delta^{13}C\) from the paper by Teeri and Schoeller (1979) are given in correctly. The value for the corn diet should read +1.8, rather than –2.7; in the next row after the corn diet (i.e. the first of the prepared diets), the value for \(\Delta \delta^{13}C\) should be +1.9, rather than +1.8. These two errors in the appendix occurred during the preparation of the manuscript and do not affect any of the values presented in the body of the paper.
