CIRES Graduate Students Earn Top Fellowships

Congratulations to the many CIRES graduate students awarded prestigious fellowships this spring.

NASA Earth and Space Science Fellowship winners

- Jessica Axson, Chemistry and Biochemistry

Research topic: Atmospheric processing of methylglyoxal and glyoxal in aqueous environments

Advisor: Veronica Vaida

- Lin Liu, Physics

Research topic: Using InSAR measurements to study salt tectonics in Colorado and crustal deformation near Jakobshavn Isbrae, Greenland

Advisor: John Wahr

- Carly Robinson, Chemistry and Biochemistry

Research topic: Development and application of a soft-ionization technique for in-situ organic aerosol analysis

Advisor: Jose Luis Jimenez

- John Smith, Aerospace Engineering Sciences

Research topic: Whole atmosphere LIDAR for study of whole-atmosphere waves and dynamics

Advisor: Xinzhaoh Chu

- Samantha Stevenson, Atmospheric and Oceanic Sciences

Research topic: Mechanisms of decadal ENSO variability in the CCSM3.5

Advisor: Baylor Fox-Kemper

NSF Graduate Research Fellowship winners

- Adriana Bailey, Atmospheric and Oceanic Sciences

Research topic: Assessing water vapor's climate feedbacks using isotopologue retrievals

Advisor: David Noone

- Stephanie Higgins, Atmospheric and Oceanic Sciences, Geology

Research topic: Hurricane intensity forecasting

Advisor: Katja Friedrich (ATOC), Roger Bilham (Geology)

- Kelly Ramirez, Ecology and Evolutionary Biology

Research topic: The responses of soil microbial communities to anthropogenic nitrogen additions

Advisor: Noah Fierer

NCAR Advanced Study Program

- Jia Hu, Ph.D., Ecology and Evolutionary Biology

Research topic: Understanding the impacts of climate change on carbon and water dynamics on the Tibetan Plateau
