

Remote Sensing of the Environment
GEOG/GEOL 4093/5093

Lab Attendance and Grading Policies

- Lab assignments are worth 30% of your total course grade.
- There are 10 lab assignments in all.
- Lab assignments are due in lab the week after we have worked on them.
- Labs are due at the beginning of lab.
- Late labs will be deducted 25% for each week they are late.
- You are encouraged to work on your lab assignments together, but please be sure to put your answers in your own words and hand in your own assignment. Copying is considered a form of cheating (Please refer to the lecture syllabus on CU's honor code and cheating policy).

Structure of Lab sessions

For the first part of each lab session we will have a review of the material that we have covered in class and the material that will be addressed in the lab. For the second part of lab we will briefly go over the computer setup and what is expected for the assignment. We will be using Environment for Visualizing Images (ENVI) software for most of the labs. You will be given logins to the computer in the classroom and also door codes for the room. If you have any trouble with logging in or entering the room let me know.

Please come prepared, i.e. reading the day's assignment before you come to lab. I recommend bringing a calculator each week. You may also bring your lecture notes and textbook. Also, I encourage you to come by my office hours or email me if you having any problems. I check my email often, but please do not email me the night before a lab is due and expect me to get back to you in time.

Lab assignment schedule

Lab assignments can be found on the website
