

Community Partner Wanted

Now that you've worked through the process of understanding a community-based science project, how would you present yourself and what you seek to a prospective partner?

- In everyday terms, please describe the science you do and how it could connect to the kinds of things communities deal with in the places they live, work and play
- Describe why you are interested in a community-based science project.
- What do you expect to get out of working with a community?
- Describe the skills and expertise you would bring. Include both technical and non-technical skills.
- Where have you worked geographically or where would you like to work?
- What are important qualities in a community you would like to work with?
- How much time can you devote?
