Local teens explore, study environmental climate change effects on area community

Southern Colorado, New Mexico students create engaging films during CU Boulder science education workshop experience

Katie Warnock

University of Colorado Boulder

Seventeen high school students from Colorado and New Mexico journeyed to the University of Colorado Boulder recently to explore — through film — the effects of environmental change in their lives and their communities.

Through an intensive, cross-discipline experience hosted by the Cooperative Institute for Research in Environmental Sciences (CIRES) at CU Boulder, the students from New Mexico and Colorado will help support Ark’s 2020 Pet Calendar

Local Relay for Life organizer Kendra Doherty believes that this year’s event on Saturday, Aug. 3 may be the largest area relay ever in the group’s continual fight against cancer. The evening’s schedule has a lot more cancer patients in our county this year,” said event organizer Kendra Doherty of Roar Against Cancer.

Historical Society to host annual summer picnic

Popular musician, songwriter Sam Bachicha to be honored as Centennial Citizen for 2019

Friends of Historic Trinidad

The Trinidad Historical Society and The Friends of Historic Trinidad will hold their annual picnic on Saturday July 27, 2019, at the A.R. Mitchell Museum in downtown Trinidad from 11 a.m. to 3 p.m. Lunch will be served at 11:45 a.m.

A highlight of the picnic will be the Centennial Citizen Award for 2019, which will honor Sam Bachicha, a popular musician and songwriter who was selected to receive the award this year. He is being presented this distinction for the many years he has dedicated his time to sing and play western music for organizations and par

WEATHER WATCH

Thursday: A 70 percent chance of showers and thunderstorms becoming likely, mainly in the afternoon. High near 83. A 70 percent chance of showers and thunderstorms. Mostly cloudy, with a low around 58. Winds around 3 mph.

Friday: An 80 percent chance of showers and thunderstorms. High near 79. A 90 percent chance of showers and thunderstorms. Partly cloudy, with a low around 55. Winds around 5 mph.

Saturday: An 80 percent chance of showers and thunderstorms becoming likely by late afternoon. South wind 5 to 10 mph. High near 89. A 90 percent chance of showers and thunderstorms. Mostly cloudy, with a low around 59. Southeast wind 5 to 10 mph.

The Chronicle-News

Mark Simon of Trinidad was arrested by police and has been charged with multiple felony and misdemeanor counts after the alleged role in a vehicle break-in at 2206 Grand Ave. on Monday, July 15. Police were dispatched to the area at approximately 1:50 p.m. that day after a report from the alleged victim that her 2007 Chevrolet Equinox LT, was being tampered through by an unknown suspect.

While on their way to the scene, police were advised that the
Local teens explore climate change

National Science Foundation’s Innovative Tech- nology Experiences for Students and Teachers (ITEST) targets students who are in the 5th through 8th grade and those who are college-age students. The program encompasses ITEST’s goals of engaging young people in climate change of their own communities and strate- gies of Denver mentors worked closely with the students throughout the week, as they observed, recorded and examined images from their daily research, and film-making. Many of the students visited and filmed at CU Boulder, such as a group of field workers from the Leaky. program, which teaches them about making their films that take learners to change makers and build resilience for their com- munities. The empowerment is as important as STEM skills they gain.

The workshop asked them to think harder about the effects of climate change on their every- day lives. Students at the CU Boulder Film School in Denver mentored, worked closely with the students throughout the week, as they observed, tabulated and examined images from their daily research, and film-making.
