Expo Lesson: Drought

Would your strategy work? Is it needed?

Research the feasibility of your strategy idea, and whether it's needed. Interview 5 friends or family members in your community to get ideas for your proposal, or create a short Google form survey to collect ideas and learn more about the community's need for a solution.

Consider the following questions as you are interviewing or surveying people:

1. Are you concerned about drought in your community? Why or why not?
2. What is our risk for drought in our community? Are droughts common here?
3. How would drought affect you if one occurs?
4. Do you know what to do if a drought happens?
5. *Share your idea for a solution.* What do you think of this solution?
6. Do you have ideas of what we can do in our community to be prepared for and mitigate the impacts of a drought?
7. Do you have ideas for solutions that I could implement to increase our community's resilience to drought?

These materials were developed by CIRES Education & Outreach at CU Boulder.
