

Drought Level 01 – Moderate Drought

Some damage to crops, pastures
 Some water shortages
 Voluntary water-use restrictions requested

SPIN OR ROLL	OUTCOME
2	Wildfire outbreak in nearby forest If you invested in Increased Forest Management (C), you have mitigated this outcome. If you did not, remove 5mL of water from your Reservoir.
6	Water restrictions for households If you invested in Household Rainwater Collection Initiatives (K), you have mitigated this outcome. If you did not, remove 5mL of water from your Reservoir.
4	Decrease in crop and rangeland production If you invested in either educational outreach on soil health (A) or Campaign to promote water-efficient crops (H), you have mitigated this outcome. If you did not, remove 5mL of water from your Reservoir.
12	Break in main water line If you invested in Improve Water Infrastructure (D), you have mitigated this outcome. If you did not, remove 5mL of water from your Reservoir.
7	Short term heat wave If you invested in direct economic incentives to reduce water use (I), or grants for water-saving measures (K), you have mitigated this outcome. If you did not, remove 5mL of water from your Reservoir.
11	Insect outbreak destroys crops If you invested in an integrated pest management (L), you have mitigated this outcome. If you did not, remove 5mL of water from your Reservoir.
3	New housing development stresses water needs If you invested in either improved water infrastructure (D) building a wastewater recycling facility (E) or a new storage reservoir (G), you have mitigated this outcome. If you did not, remove 5mL of water from your Reservoir.
5, 8, 9 or 10	NO DROUGHT IMPACTS If you roll any of these numbers, you have managed to avoid drought impacts in your community for this round.

Drought Level 02 – Severe Drought

Crop or pasture loss likely
 Water shortages common
 Water restrictions imposed

SPIN/ROLL	OUTCOME
10	Wildfire outbreak in nearby forest If you invested in Increased Forest Management (C), you have mitigated this outcome. If you did not, remove 5mL of water from your Reservoir.
6	Water restrictions for households If you invested in Household Rainwater Collection Initiatives (K), you have mitigated this outcome. If you did not, remove 10mL of water from your Reservoir.
5	Decrease in crop and rangeland production If you invested in either educational outreach on soil health (A) or Campaign to promote water-efficient crops (H), you have mitigated this outcome. If you did not, remove 5mL of water from your Reservoir.
12	Break in main water line If you invested in Improve Water Infrastructure (D), you have mitigated this outcome. If you did not, remove 5mL of water from your Reservoir.
3	Short term heat wave If you invested in direct economic incentives to reduce water use (I), or grants for water-saving measures (K), you have mitigated this outcome. If you did not, remove 5mL of water from your Reservoir.
11	Insect outbreak destroys crops If you invested in an integrated pest management (L), you have mitigated this outcome. If you did not, remove 5mL of water from your Reservoir.
9	Increased hospitalization for heatstroke, asthma and other drought-related health effects If you invested in a public health awareness campaign (F), you have mitigated this outcome. If you did not, remove 5mL of water from your Reservoir.
4	Early harvest and selling of livestock If you invested in grants to farmers (J) or a campaign to promote water-efficient crops (H), you have mitigated this outcome. If you did not, remove 5mL of water from your Reservoir.
8	Regional water restrictions If you invested in building a new storage reservoir (G) or building a new wastewater recycling facility (E), you have mitigated this outcome. If you did not, remove 10mL of water from your Reservoir.
2	New housing development stresses water needs If you invested in either improved water infrastructure (D), building a wastewater recycling facility (E), or a new storage reservoir (G), you have mitigated this outcome. If you did not, remove 5mL of water from your Reservoir.
7	NO DROUGHT IMPACTS You have managed to avoid drought impacts in your community for this round.

Drought Level 03 – Extreme Drought

Major crop/pasture losses
Widespread water shortages or restrictions

SPIN/ROLL	OUTCOME
3	Wildfire outbreak in nearby forest If you invested in Increased Forest Management (C), you have mitigated this outcome. If you did not, remove 5mL of water from your Reservoir.
9 or 10	Water restrictions for households If you invested in Household Rainwater Collection Initiatives (K), you have mitigated this outcome. If you did not, remove 10mL of water from your Reservoir.
6	Crop and rangeland failure If you invested in either educational outreach on soil health (A) and campaign to promote water-efficient crops (H), you have mitigated this outcome. If you did not, remove 5mL of water from your Reservoir.
12	Break in main water line If you invested in Improve Water Infrastructure (D), you have mitigated this outcome. If you did not, remove 5mL of water from your Reservoir.
4	Lawsuits over water rights If you invested in a drought planning board (B), you have mitigated this outcome. If you did not, remove 5mL of water from your Reservoir.
11	Insect outbreak destroys crops If you invested in an integrated pest management (L), you have mitigated this outcome. If you did not, remove 10mL of water from your Reservoir.
8	Increased hospitalization for heatstroke, asthma and other drought-related health effects If you invested in a public health awareness campaign (F), you have mitigated this outcome. If you did not, remove 5mL of water from your Reservoir.
5	Early harvest and selling of livestock If you invested in grants to farmers and ranchers (J) you have partially mitigated the outcome; remove 5mL of water. If you invested in a campaign to promote water-efficient crops (H), you have fully mitigated this outcome; remove no water. If you did neither, remove 10mL of water from your Reservoir.
7	Regional water restrictions If you invested in building a new storage reservoir (G) or building a new wastewater recycling facility (E), you have mitigated this outcome. If you did not, remove 10mL of water from your Reservoir.
2	New housing development stresses water needs If you invested in either improved water infrastructure (D), building a wastewater recycling facility (E), or a new storage reservoir (G), you have mitigated this outcome. If you did not, remove 5mL of water from your Reservoir.
